Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The recitation " a cable access opening defined in the bottom within the second cableway" is not sufficiently described in the specification or shown in the drawings. There is no opening in the bottom of the second horizontal cableway. There is an opening 60 at the juncture of mounting wall 50 and bottom 56 but that is claimed in claim 4 as being within the first cableway.

The examiner suggests that claim 5 be cancelled as having insufficient support in the disclosure.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hudson et al. 5,023,404.

Hudson et al.(see Figure 3) teach a mounting side 28, a bottom 25, having an opening therein, a first outer wall 30, a second outer wall 26, first cableway 34, second cableway 32, opening 40 in second outer wall.

Art Unit: 3634

The prior art made of record is considered pertinent to applicant's disclosure. All art cited by applicant has been considered and made of record. Hudson et al. 5,023,404 directed to a wiring duct is of particular note.
